Source: ADSL,ADRSIRC,ADTTEIRC. Data cutoff: 04MAY2022. Data extraction: 31MAY2022.
Abbreviations: IRC, independent review committee; CI, confidence interval; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.
Percentages are based on N for each age group or total.
The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.
Overall Response Rate is defined as the proportion of patients who achieved at least a best overall response of PR or better.
Time to Response is defined as time from the first dose date to the date of earliest qualifying response (PR or CR). Only responders are included in the analysis.
For 061019-002 patient, modified PET+CT+Clinical response per IRC at Cycle 3 is non-PD due to missing PET scan at that visit but with time point response of SD by CT per IRC.

Abbreviations: IRC, independent review committee; CI, confidence interval; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation; MALT, Extranodal Marginal Zone Lymphoma of Mucosa-associated Lymphoid Tissue; NMZL, Nodal Marginal Zone Lymphoma; SMZL, Splenic Marginal Zone Lymphoma.

Percentages are based on N for each MZL subtype or total.

Overall Response Rate is defined as the proportion of patients who achieved at least a best overall response of PR or better.

Time to Response is defined as time from the first dose date to the date of earliest qualifying response (PR or CR). Only responders are included in the analysis.

For 061019-002 patient, modified PET+CT+Clinical response per IRC at Cycle 3 is non-PD due to missing PET scan at that visit but with time point response of SD by CT per IRC.

[a] 2-sided Clopper-Pearson 95% CI

Source: ADSL,ADQS,SV,VE. Data cutoff: 04MAY2022. Data extraction: 31MAY2022.

Patients should complete the EQ-5D-5L and EORTC QLQ-C30 questionnaires before the first dose of study drug, and before performing any other procedures. The questionnaires are to be completed on Cycle 1 Day 1, end of Cycle 3, then every 12 weeks for 12 months, followed by every 24 weeks thereafter. Patient-reported outcomes will continue to be assessed until disease progression, death, or withdrawal of consent, regardless of study treatment discontinuation.

[a] Compliance rate = the number of patients who completed questionnaire / number of patients expected to complete questionnaire at each visit.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Source: ADSL,ADQS. Data cutoff: 04MAY2022. Data extraction: 31MAY2022.

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Source: ADSL,ADQS. Data cutoff: 04MAY2022. Data extraction: 31MAY2022.

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

The total column is not the total of all four age subgroups; it is the total of the subgroups < 65 years and ≥ 65 years, which is equivalent to the total of the subgroups < 75 years and ≥ 75 years.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).

Abbreviations: EORTC QLQ-C30, European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-C30; Max, maximum; Min, minimum; Q1, first quartile; Q3, third quartile; SD, standard deviation; MALT, Extranodal Marginal Zone Lymphoma of Mucosa-associated Lymphoid Tissue; NMZL, Nodal Marginal Zone Lymphoma; SMZL, Splenic Marginal Zone Lymphoma.

Only patients with data at both baseline and corresponding postbaseline visit are included in the summary statistics for change from baseline.

The EORTC QLQ-C30 incorporates nine multi-item scales: five functional scales (Physical, Role, Cognitive, Emotional and Social Functioning); three symptom scales (Fatigue,Pain and Nausea/Vomiting); and a Global Health Status/QoL scale. Six single item scales are also included (Dyspnoea, Insomnia, Appetite Loss, Constipation, Diarrhoea and Financial Difficulties).
