Time since enrollment to CTL019 infusion: Missing

Group term Preferred term	All patients N=1 All grades n (%)	Grade 1 n (%)	Grade 2 n (%)	Grade 3 n (%)	Grade 4 n (%)
Staphylococcal infection	1 (100)	0	0	0	1 (100)

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility - Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220a
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Age
Safety Set

Timing: within 8 weeks post infusion, Age: >=10 years to <18 years

Primary system organ class Preferred term	All grades Total events	All patients N=34 n (%)[1]	Grade >= 3 Total events	All patients N=34 n (%)[2]
Total number of AE per patient	701	34 (100.00)	236	30 (88.24)
Blood and lymphatic system disorders				
- Total	67	25 (73.53)	51	22 (64.71)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220a
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Age
Safety Set

Timing: At anytime, Age: >=10 years to <18 years

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220b
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Gender
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220b
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Gender
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220c
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Race
Safety Set

Timing: within 8 weeks post infusion, Race: White

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220c
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Race

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220d
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Ethnicity
Safety Set

Oropharyngeal pain	1	1 (5.88)	0	0 (0.00)
Rhinitis allergic	1	1 (5.88)	0	0 (0.00)
Rhinorrhoea	1	1 (5.88)	0	0 (0.00)

Timing: >1 year post-CTL019 infusion, Ethnicity: Other

Primary system organ class Preferred term	All grades Total events	All patients N=17 n (%)[1]	Grade >= 3 Total events	All patients N=17 n (%)[2]
Skin and subcutaneous tissue disorders				
- Total	1	1 (5.88)	0	0 (0.00)
Acne	1	1 (5.88)	0	0 (0.00)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220d
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Ethnicity
Safety Set

Timing: At anytime, Ethnicity: Hispanic or Latino

Primary system organ class Preferred term	All grades Total events	All patients N=25 n (%)[1]	Grade >= 3 Total events	All patients N=25 n (%)[2]
Total number of AE per patient	668	25 (100.00)	217	24 (96.00)
Blood and lymphatic system disorders				
- Total	59	20 (80.00)	47	19 (76.00)
Anaemia	19	11 (44.00)	12	7 (28.00)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220e
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Response status at study entry
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220g
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and MLL rearrangement
Safety Set

Timing: At anytime, Mixed-lineage leukemia rearrangement: No

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220i
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and BCR-ABL1-like
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, BCR-ABL1-like: Yes

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220j
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Complex Karyotypes
Safety Set

Timing: within 8 weeks post infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

Primary system organ class Preferred term	All grades Total events	All patients N=19 n (%)[1]	Grade >= 3 Total events	All patients N=19 n (%)[2]
Total number of AE per patient	512	19 (100.00)	174	16 (84.21)
Blood and lymphatic system disorders				
- Total	49	13 (68.42)	33	12 (63.16)
Anaemia	19	7 (36.84)	11	6 (31.58)
Thrombocytopenia	14	2 (10.53)	8	2 (10.53)
Febrile neutropenia	10	8 (42.11)	10	8 (42.11)
Neutropenia	2	1 (5.26)	1	1 (5.26)
Coagulopathy	1	1 (5.26)	0	0 (0.00)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220j
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Complex Karyotypes
Safety Set

Cough	1	1 (4.35)	0	0 (0.00)

Timing: >1 year post-CTL019 infusion, Complex karyotypes II (>=5 unrelated abnormalities) : No

Primary system organ class Preferred term	All grades Total events	All patients N=23 n (%)[1]	Grade >= 3 Total events	All patients N=23 n (%)[2]
Epistaxis	1	1 (4.35)	0	0 (0.00)
Skin and subcutaneous tissue disorders				
- Total	2	2 (8.70)	0	0 (0.00)
Papule	1	1 (4.35)	0	0 (0.00)
Pruritus	1	1 (4.35)	0	0 (0.00)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220j
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Complex Karyotypes
Safety Set

Timing: At anytime, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

Primary system organ class Preferred term	All grades Total events	All patients N=19 n (%)[1]	Grade >= 3 Total events	All patients N=19 n (%)[2]
Total number of AE per patient	702	19 (100.00)	215	18 (94.74)
Blood and lymphatic system disorders				
- Total	59	16 (84.21)	41	15 (78.95)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220k
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Region
Safety Set

Timing: within 8 weeks post infusion, Region: US

Primary system organ class Preferred term	All grades Total events	All patients N=64 n (%)[1]	Grade >= 3 Total events	All patients N=64 n (%)[2]

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220k
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Region
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Region: US

Primary system organ class Preferred term	All grades Total events	All patients N=56 n (%)[1]	Grade >= 3 Total events	All patients N=56 n (%)[2]

Hot flush	1	1 (1.79)	0	0 (0.00)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220k
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Region
Safety Set

Timing: >1 year post-CTL019 infusion, Region: US

Primary system organ class Preferred term	All grades Total events	All patients N=34 n (%)[1]	Grade >= 3 Total events	All patients N=34 n (%)[2]
Total number of AE per patient	90	22 (64.71)	23	12 (35.29)
Blood and lymphatic system disorders				
- Total	2	2 (5.88)	1	1 (2.94)
Febrile neutropenia	1	1 (2.94)	1	1 (2.94)

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220l
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Prior SCT therapy
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220l
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Prior SCT therapy

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220l
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Prior SCT therapy

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220m
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Eligibility for SCT
Safety Set

Timing: within 8 weeks post infusion, Eligibility for SCT: Yes

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220m
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Eligibility for SCT
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220m
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Eligibility for SCT
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220n
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

Timing: within 8 weeks post infusion, Baseline bone marrow tumor burden: Low

Primary system organ class Preferred term	All grades Total events	All patients N=20 n (%)[1]	Grade >= 3 Total events	All patients N=20 n (%)[2]

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220n
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220n
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220q
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Time since enrollment to CTL019 infusion
Safety Set

Timing: within 8 weeks post infusion, Time since enrollment to CTL019 infusion: > Median

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220q
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Time since enrollment to CTL019 infusion

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220q
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Time since enrollment to CTL019 infusion
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220r
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Number of previous relapses
Safety Set

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

Table 220r
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Number of previous relapses

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
Percentages are calculated out of number of patients in safety set.
1 number of patients with any AE (irrespective of grade)
2 number of patients with Grade 3 or more AE

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported

in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 225a
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Age

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 225c
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Race

- A patient with multiple adverse events within a group term is counted only once in the total row.- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 225l
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy
Safety Set

- A patient with multiple adverse events within a group term is counted only once in the total row.- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 225o
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence
Safety Set

- A patient with multiple adverse events within a group term is counted only once in the total row.- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 225q
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

Cough	1 (10.0)	1 (10.0)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 225r
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses
Safety Set

Timing: >1 year post-CTL019 infusion, Number of previous relapses: >=3

Hypertension	1 (12.5)	1 (12.5)	0

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all

grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 227e
Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Enrolled set

Response status at study entry: Relapsed disease

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility - Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 231a

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 231e
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Enrolled set – non – infused patients

Response status at study entry: Primary refractory

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 231r
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses
Enrolled set – non – infused patients

Number of previous relapses: 2

	All patients N=3

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233b
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Gender

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233d
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Ethnicity

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233e
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Enrolled set

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233g
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and

accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233i
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233k
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Region

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion,

are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233r
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

[1] Percentiles with 95% CIs are calculated from PROC LIFETEST output using method of Brookmeyer and Crowley (1982).
[2] % Event-free probability estimate is the estimated probability that a patient will remain event-free up to the specified time point. % Event-free probability estimates are obtained from the Kaplan-Meier survival estimates; Greenwood formula is used for CIs of KM estimates.
