Modul 4 A - Separater Anhang 4-H.2 (Teil 2)

Refraktäre oder rezidivierte pädiatrische akute lymphatische B-Zell-Leukämie

Studie CCTL019B2205J (ENSIGN)

Stand: 31.08.2023

Table of Contents

Table 194a => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Age (Safety Set) 23
Table 194b => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender (Safety Set) 45
Table 194c => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Race (Safety Set) 62
Table 194d => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Safety Set) 86
Table 194e => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Safety Set) 103
Table 194f => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Safety Set) 119
Table 194g => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Safety Set) 134
Table 194h => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Safety Set) 149
Table 194i => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Safety Set) 164
Table 194j => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Safety Set) 180
Table 194k => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Region (Safety Set) 196
Table 194l => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Safety Set) 205
Table 194m => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Safety Set) 222
Table 194n => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Safety Set) 238
Table 194o => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Safety Set) 255
Table 194p => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Safety Set) 270
Table 194q => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Safety Set) 286
Table 194r => Serious adverse events (SAE) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Safety Set) 303

Table 195a => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Age (Enrolled set) 334
Table 195b => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Gender (Enrolled set) 341
Table 195c => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Race (Enrolled set) 346
Table 195d => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Enrolled set) 353
Table 195e => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Enrolled set) 358
Table 195f => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set) 363
Table 195g => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set) 368
Table 195h => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set) 372
Table 195i => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set) 376
Table 195j => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set) 380
Table 195k => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Region (Enrolled set) 385
Table 195l => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set) 387
Table 195m => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set) 392
Table 195n => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set) 397
Table 195o => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Enrolled set) 402
Table 195p => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Enrolled set) 407
Table 195q => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Enrolled set) 412
Table 195r => Serious adverse events (SAE) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Enrolled set) 419
Table 196a => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Age (Enrolled set - Patients who received lymphodepleting chemotherapy) 428

Table 196b => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Gender (Enrolled set - Patients who received lymphodepleting chemotherapy) 434
Table 196c => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Race (Enrolled set - Patients who received lymphodepleting chemotherapy) 439
Table 196d => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Enrolled set - Patients who received lymphodepleting chemotherapy) 445
Table 196e => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Enrolled set - Patients who received lymphodepleting chemotherapy) 450
Table 196f => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set - Patients who received lymphodepleting chemotherapy) 454
Table 196g => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set - Patients who received lymphodepleting chemotherapy) 458
Table 196h => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set - Patients who received lymphodepleting chemotherapy) 462
Table 196i => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set - Patients who received lymphodepleting chemotherapy) 466
Table 196j => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set - Patients who received lymphodepleting chemotherapy) 471
Table 196k => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Region (Enrolled set - Patients who received lymphodepleting chemotherapy) 475
Table 196l => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set - Patients who received lymphodepleting chemotherapy) 477
Table 196m => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set - Patients who received lymphodepleting chemotherapy) 482
Table 196n => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set - Patients who received lymphodepleting chemotherapy) 487

Table 196o => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Enrolled set - Patients who received lymphodepleting chemotherapy) 492
Table 196p => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Enrolled set - Patients who received lymphodepleting chemotherapy) 496
Table 196q => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Enrolled set - Patients who received lymphodepleting chemotherapy) 500
Table 196r => Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Enrolled set - Patients who received lymphodepleting chemotherapy) 507
Table 197a => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Age (Enrolled set – non – infused patients) 515
Table 197b => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Gender (Enrolled set – non – infused patients) 524
Table 197c => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Race (Enrolled set – non – infused patients) 530
Table 197d => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Enrolled set – non – infused patients) 538
Table 197e => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Enrolled set – non – infused patients) 545
Table 197f => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set – non – infused patients) 552
Table 197g => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set – non – infused patients) 556
Table 197h => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set – non – infused patients) 560
Table 197i => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set – non – infused patients) 564
Table 197j => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set – non – infused patients) 568
Table 197k => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Region (Enrolled set – non – infused patients) 575
Table 197l => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set – non – infused patients) 579
Table 197m => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set – non – infused patients) 586

Table 197n => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set – non – infused patients) 593
Table 197o => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Enrolled set – non – infused patients) 600
Table 197p => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Enrolled set – non – infused patients) 606
Table 197q => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Enrolled set – non – infused patients) 610
Table 197r => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Enrolled set – non – infused patients) 614
Table 198a => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Age (Enrolled set) 625
Table 198b => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Gender (Enrolled set) 634
Table 198c => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Race (Enrolled set) 641
Table 198d => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Enrolled set) 649
Table 198e => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Enrolled set) 656
Table 198f => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set) 662
Table 198g => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set) 668
Table 198h => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set) 674
Table 198i => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set) 680
Table 198j => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set) 686
Table 198k => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Region (Enrolled set) 693
Table 198l => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set) 696
Table 198m => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set) 703
Table 198n => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set) 710

Table 198o => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Enrolled set) 716
Table 198p => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Enrolled set) 722
Table 198q => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Enrolled set) 728
Table 198r => Serious adverse events (SAE) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Enrolled set) 737
Table 199a => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Age (Safety Set) 748
Table 199b => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Gender (Safety Set) 789
Table 199c => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Race (Safety Set) 823
Table 199d => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Ethnicity (Safety Set) 863
Table 199e => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Response status at study entry (Safety Set) 897
Table 199f => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Safety Set) 929
Table 199g => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and MLL rearrangement (Safety Set) 959
Table 199h => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Hypodiploidy (Safety Set) 988
Table 199i => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and BCR-ABL1-like (Safety Set) 1014
Table 199j => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Complex Karyotypes (Safety Set) 1045
Table 199k => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Region (Safety Set) 1076
Table 199l => Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Prior SCT therapy (Safety Set) 1098

Table 220o => Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Baseline extramedullary disease presence (Safety Set) 4010
Table 220p => Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Down syndrome (Safety Set) 4093

Table 220q => Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Time since enrollment to CTL019 infusion (Safety Set) 4171
Table 220r => Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Number of previous relapses (Safety Set) 4261
Table 221a => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Age (Safety Set) 4392
Table 221b => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Gender (Safety Set) 4408
Table 221c => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Race (Safety Set) 4419
Table 221d => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Ethnicity (Safety Set) 4435
Table 221e => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Response status at study entry (Safety Set) 4446
Table 221f => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Philadelphia chromosome/BCR-ABL (Safety Set) 4457
Table 221g => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by MLL rearrangement (Safety Set) 4467
Table 221h => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Hypodiploidy (Safety Set) 4478
Table 221i => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by BCR-ABL1-like (Safety Set) 4489
Table 221j => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Complex Karyotypes (Safety Set) 4500
Table 221k => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Region (Safety Set) 4511
Table 221l => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Prior SCT therapy (Safety Set) 4516
Table 221m => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Eligibility for SCT (Safety Set) 4527
Table 221n => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Baseline bone marrow tumor burden (Safety Set) 4538
Table 221o => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Baseline extramedullary disease presence (Safety Set) 4549
Table 221p => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Down syndrome (Safety Set) 4560
Table 221q => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Time since enrollment to CTL019 infusion (Safety Set) 4571
Table 221r => Cytokine release syndrome post CTL019 infusion, regardless of study drug relationship by Number of previous relapses (Safety Set) 4582
Table 223a => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Age (Enrolled set) 4603
Table 223b => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Gender (Enrolled set) 4613
Table 223c => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Race (Enrolled set) 4620
Table 223d => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Ethnicity (Enrolled set) 4630
Table 223e => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Response status at study entry (Enrolled set) 4637
Table 223f => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set) 4644
Table 223g => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set) 4651
Table 223h => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set) 4654

Table 223i => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set) 4658
Table 223j => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set) 4665
Table 223k => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Region (Enrolled set) 4672
Table 223l => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set) 4676
Table 223m => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set) 4683
Table 223n => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set) 4690
Table 223o => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Enrolled set) 4697
Table 223p => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Down syndrome (Enrolled set) 4704
Table 223q => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Enrolled set) 4708
Table 223r => Serious adverse events of special interest (AESI) before study treatment based on identified risk, by group term, preferred term, maximum CTC grade and Number of previous relapses (Enrolled set) 4718
Table 225a => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Age (Safety Set) 4731
Table 225b => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender (Safety Set) 4800
Table 225c => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Race (Safety Set) 4838
Table 225d => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Safety Set) 4904
Table 225e => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Safety Set) 4945
Table 225f => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Safety Set) 4990
Table 225g => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Safety Set) 5025
Table 225h => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Safety Set) 5058

Table 225i => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Safety Set)...5081
Table 225j => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Safety Set) 5122
Table 225k => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Region (Safety Set) 5168
Table 225l => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Safety Set) 5186
Table 225m => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Safety Set)5226
Table 225n => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Safety Set) 5264
Table 225o => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Safety Set)..... 5304
Table 225p => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Safety Set)...5345
Table 225q => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Safety Set) 5381
Table 225r => Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Safety Set)..... 5416
Table 227a => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Age (Enrolled set) 5505
Table 227b => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Gender (Enrolled set) 5514
Table 227c => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Race (Enrolled set) 5519
Table 227d => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Enrolled set) 5534
Table 227e => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Enrolled set) 5539
Table 227f => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set) 5549
Table 227g => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set)..... 5555

Table 227h => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set) 5563
Table 227i => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set) 5568
Table 227j => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set) 5575
Table 227k => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Region (Enrolled set) 5580
Table 227l => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set) 5582
Table 227m => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set) 5587
Table 227n => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set) 5594
Table 227o => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Enrolled set) 5599
Table 227p => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Enrolled set) 5607
Table 227q => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Enrolled set) 5614
Table 227r => Non-severe adverse events (AE CTCAE Grade 1/2) before study treatment that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Enrolled set) 5621
Table 229a => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Age (Enrolled set - Patients who received lymphodepleting chemotherapy) 5637
Table 229b => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Gender (Enrolled set - Patients who received lymphodepleting chemotherapy) 5647
Table 229c => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Race (Enrolled set - Patients who received lymphodepleting chemotherapy) 5652
Table 229d => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Enrolled set - Patients who received lymphodepleting chemotherapy) 5661
Table 229e => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Enrolled set - Patients who received lymphodepleting chemotherapy) 5666

Table 229f => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set - Patients who received lymphodepleting chemotherapy) 5672
Table 229g => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set - Patients who received lymphodepleting chemotherapy) 5677
Table 229h => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set - Patients who received lymphodepleting chemotherapy) 5684
Table 229i => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set - Patients who received lymphodepleting chemotherapy) 5686
Table 229j => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set - Patients who received lymphodepleting chemotherapy) 5691
Table 229k => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Region (Enrolled set - Patients who received lymphodepleting chemotherapy) 5696
Table 229l => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set - Patients who received lymphodepleting chemotherapy) 5698
Table 229m => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set - Patients who received lymphodepleting chemotherapy) 5703
Table 229n => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set - Patients who received lymphodepleting chemotherapy) 5708
Table 229o => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence (Enrolled set - Patients who received lymphodepleting chemotherapy) 5713
Table 229p => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Down syndrome (Enrolled set - Patients who received lymphodepleting chemotherapy) 5719
Table 229q => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion (Enrolled set - Patients who received lymphodepleting chemotherapy) 5725
Table 229r => Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses (Enrolled set - Patients who received lymphodepleting chemotherapy) 5733

Table 231a => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Age (Enrolled set – non – infused patients) 5745
Table 231b => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Gender (Enrolled set – non – infused patients) 5754
Table 231c => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Race (Enrolled set – non – infused patients) 5759
Table 231d => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Ethnicity (Enrolled set – non – infused patients) 5769
Table 231e => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Response status at study entry (Enrolled set – non – infused patients) 5777
Table 231f => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL (Enrolled set – non – infused patients) 5784
Table 231g => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement (Enrolled set – non – infused patients) 5786
Table 231h => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy (Enrolled set – non – infused patients) 5788
Table 231i => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like (Enrolled set – non – infused patients) 5790
Table 231j => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes (Enrolled set – non – infused patients) 5792
Table 231k => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Region (Enrolled set – non – infused patients) 5799
Table 231l => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy (Enrolled set – non – infused patients) 5801
Table 231m => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT (Enrolled set – non – infused patients) 5808
Table 231n => Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden (Enrolled set – non – infused patients) 5816

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 196q
Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion
Enrolled set - Patients who received lymphodepleting chemotherapy

Sub group=Time since enrollment to CTL019 infusion: Missing

	All patients N=1		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one event	1 (100)	1 (100)	0
Blood and lymphatic system disorders			
- Total	1 (100)	1 (100)	0
Febrile neutropenia	1 (100)	1 (100)	0

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 196r
Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses
Enrolled set - Patients who received lymphodepleting chemotherapy

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour Lysis Syndrome					
-Total	1 (1.8)	0	0	1 (1.8)	0
Tumour lysis syndrome	1 (1.8)	0	0	1 (1.8)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 199e
Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Response status at study entry
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Response status at study entry: Primary refractory

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour lysis syndrome	1 (1.6)	0	0	1 (1.6)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Group term Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Prolonged depletion of normal B cells or Agammaglobulinemia					
-Total	1 (5.0)	0	1 (5.0)	0	0
Immunodeficiency	1 (5.0)	0	1 (5.0)	0	0
Serious neurological adverse reactions					
-Total	1 (5.0)	1 (5.0)	0	0	0
Disturbance in attention	1 (5.0)	1 (5.0)	0	0	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and

accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour lysis syndrome	5 (9.4)	0	0	5 (9.4)	0

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Death >30 days after CTL019 infusion, Age: >=10 years to <18 years

	All patients N=34
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	12 (35.3)
Injury, poisoning and procedural complications	
-Total	1 (2.9)
Complications of transplant surgery	1 (2.9)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	11 (32.4)
Acute lymphocytic leukaemia	11 (32.4)

- System organ classes are presented in alphabetical order; preferred terms are presented

in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Death >30 days after CTL019 infusion, Age: >=18

	All patients N=10
Primary system organ class **Preferred term**	**All grades** **n (%)**
Number of patients with at least one AE	6 (60.0)
Infections and infestations	
-Total	1 (10.0)
Sepsis	1 (10.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	4 (40.0)
Acute lymphocytic leukaemia	4 (40.0)
Nervous system disorders	
-Total	1 (10.0)
Seizure	1 (10.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Any time post CTL019 infusion, Age: <10 years

	All patients N=20
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	11 (55.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	10 (50.0)
Acute lymphocytic leukaemia	9 (45.0)
Glioblastoma multiforme	1 (5.0)
Nervous system disorders	
-Total	1 (5.0)
Embolic stroke	1 (5.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Any time post CTL019 infusion, Age: >=10 years to <18 years

	All patients N=34
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	13 (38.2)
Injury, poisoning and procedural complications	
-Total	1 (2.9)
Complications of transplant surgery	1 (2.9)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	12 (35.3)
Acute lymphocytic leukaemia	12 (35.3)

- System organ classes are presented in alphabetical order; preferred terms are presented

in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Any time post CTL019 infusion, Age: >=18

	All patients N=10
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	6 (60.0)
Infections and infestations	
-Total	1 (10.0)
Sepsis	1 (10.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	4 (40.0)
Acute lymphocytic leukaemia	4 (40.0)
Nervous system disorders	
-Total	1 (10.0)
Seizure	1 (10.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203b
Deaths post CTL019 infusion by primary system organ class, preferred term and Gender
Safety Set

Timing: Death within 30 days of CTL019 infusion, Gender: Female

	All patients N=34
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	2 (5.9)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (2.9)
Acute lymphocytic leukaemia	1 (2.9)
Nervous system disorders	
-Total	1 (2.9)
Embolic stroke	1 (2.9)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203b
Deaths post CTL019 infusion by primary system organ class, preferred term and Gender
Safety Set

Timing: Death >30 days after CTL019 infusion, Gender: Male

	All patients N=30
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	11 (36.7)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	10 (33.3)
Acute lymphocytic leukaemia	9 (30.0)
Glioblastoma multiforme	1 (3.3)
Nervous system disorders	
-Total	1 (3.3)
Seizure	1 (3.3)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203b
Deaths post CTL019 infusion by primary system organ class, preferred term and Gender
Safety Set

Timing: Death >30 days after CTL019 infusion, Gender: Female

	All patients N=34
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	17 (50.0)
Infections and infestations	
-Total	1 (2.9)
Sepsis	1 (2.9)
Injury, poisoning and procedural complications	
-Total	1 (2.9)
Complications of transplant surgery	1 (2.9)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	15 (44.1)

Timing: Death >30 days after CTL019 infusion, Gender: Female

Primary system organ class Preferred term	All patients N=34 All grades n (%)
Acute lymphocytic leukaemia	15 (44.1)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203b
Deaths post CTL019 infusion by primary system organ class, preferred term and Gender
Safety Set

Timing: Any time post CTL019 infusion, Gender: Male

	All patients N=30
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	11 (36.7)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	10 (33.3)
Acute lymphocytic leukaemia	9 (30.0)
Glioblastoma multiforme	1 (3.3)
Nervous system disorders	
-Total	1 (3.3)
Seizure	1 (3.3)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.

- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203g
Deaths post CTL019 infusion by primary system organ class, preferred term and MLL rearrangement
Safety Set

Timing: Death >30 days after CTL019 infusion, Mixed-lineage leukemia rearrangement: No

	All patients N=61
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	26 (42.6)
Infections and infestations	
-Total	1 (1.6)
Sepsis	1 (1.6)
Injury, poisoning and procedural complications	
-Total	1 (1.6)
Complications of transplant surgery	1 (1.6)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	23 (37.7)

Timing: Death >30 days after CTL019 infusion, Mixed-lineage leukemia rearrangement: No

Primary system organ class Preferred term	All patients N=61 All grades n (%)
Acute lymphocytic leukaemia	22 (36.1)
Glioblastoma multiforme	1 (1.6)
Nervous system disorders	
-Total	1 (1.6)
Seizure	1 (1.6)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203g
Deaths post CTL019 infusion by primary system organ class, preferred term and MLL rearrangement
Safety Set

Timing: Any time post CTL019 infusion, Mixed-lineage leukemia rearrangement: Yes

Primary system organ class **Preferred term**	**All patients** **N=3** **All grades** **n (%)**
Number of patients with at least one AE	2 (66.7)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	2 (66.7)
Acute lymphocytic leukaemia	2 (66.7)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203g
Deaths post CTL019 infusion by primary system organ class, preferred term and MLL rearrangement
Safety Set

Timing: Any time post CTL019 infusion, Mixed-lineage leukemia rearrangement: No

Primary system organ class **Preferred term**	**All patients** **N=61** **All grades** **n (%)**
Number of patients with at least one AE	28 (45.9)
Infections and infestations	
-Total	1 (1.6)
Sepsis	1 (1.6)
Injury, poisoning and procedural complications	
-Total	1 (1.6)
Complications of transplant surgery	1 (1.6)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	24 (39.3)

Timing: Any time post CTL019 infusion, Mixed-lineage leukemia rearrangement: No

Primary system organ class Preferred term	All patients N=61 All grades n (%)
Acute lymphocytic leukaemia	23 (37.7)
Glioblastoma multiforme	1 (1.6)
Nervous system disorders	
-Total	2 (3.3)
Embolic stroke	1 (1.6)
Seizure	1 (1.6)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203h
Deaths post CTL019 infusion by primary system organ class, preferred term and Hypodiploidy
Safety Set

Timing: Death within 30 days of CTL019 infusion, Hypodiploidy: No

	All patients N=63
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	2 (3.2)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (1.6)
Acute lymphocytic leukaemia	1 (1.6)
Nervous system disorders	
-Total	1 (1.6)
Embolic stroke	1 (1.6)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203h
Deaths post CTL019 infusion by primary system organ class, preferred term and Hypodiploidy
Safety Set

Timing: Death >30 days after CTL019 infusion, Hypodiploidy: Yes

	All patients N=1
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	1 (100)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (100)
Acute lymphocytic leukaemia	1 (100)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203h
Deaths post CTL019 infusion by primary system organ class, preferred term and Hypodiploidy
Safety Set

Timing: Death >30 days after CTL019 infusion, Hypodiploidy: No

	All patients N=63
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	27 (42.9)
Infections and infestations	
-Total	1 (1.6)
Sepsis	1 (1.6)
Injury, poisoning and procedural complications	
-Total	1 (1.6)
Complications of transplant surgery	1 (1.6)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	24 (38.1)

Timing: Death >30 days after CTL019 infusion, Hypodiploidy: No

Primary system organ class Preferred term	All patients N=63 All grades n (%)
Acute lymphocytic leukaemia	23 (36.5)
Glioblastoma multiforme	1 (1.6)
Nervous system disorders	
-Total	1 (1.6)
Seizure	1 (1.6)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Embolic stroke	1 (1.6)
Seizure	1 (1.6)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203i
Deaths post CTL019 infusion by primary system organ class, preferred term and BCR-ABL1-like
Safety Set

Timing: Death within 30 days of CTL019 infusion, BCR-ABL1-like: No

	All patients N=60
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	2 (3.3)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (1.7)
Acute lymphocytic leukaemia	1 (1.7)
Nervous system disorders	
-Total	1 (1.7)
Embolic stroke	1 (1.7)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203i
Deaths post CTL019 infusion by primary system organ class, preferred term and BCR-ABL1-like
Safety Set

Timing: Death >30 days after CTL019 infusion, BCR-ABL1-like: Yes

	All patients N=4
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	1 (25.0)
Injury, poisoning and procedural complications	
-Total	1 (25.0)
Complications of transplant surgery	1 (25.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203i
Deaths post CTL019 infusion by primary system organ class, preferred term and BCR-ABL1-like
Safety Set

Timing: Death >30 days after CTL019 infusion, BCR-ABL1-like: No

	All patients N=60
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	27 (45.0)
Infections and infestations	
-Total	1 (1.7)
Sepsis	1 (1.7)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	25 (41.7)
Acute lymphocytic leukaemia	24 (40.0)
Glioblastoma multiforme	1 (1.7)
Nervous system disorders	
-Total	1 (1.7)

Timing: Death >30 days after CTL019 infusion, BCR-ABL1-like: No

Primary system organ class Preferred term	All patients N=60 All grades n (%)
Seizure	1 (1.7)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203i
Deaths post CTL019 infusion by primary system organ class, preferred term and BCR-ABL1-like
Safety Set

Timing: Any time post CTL019 infusion, BCR-ABL1-like: Yes

	All patients N=4
Primary system organ class **Preferred term**	**All grades** **n (%)**
Number of patients with at least one AE	1 (25.0)
Injury, poisoning and procedural complications	
-Total	1 (25.0)
Complications of transplant surgery	1 (25.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203i
Deaths post CTL019 infusion by primary system organ class, preferred term and BCR-ABL1-like
Safety Set

Timing: Any time post CTL019 infusion, BCR-ABL1-like: No

	All patients N=60
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	29 (48.3)
Infections and infestations

Acute lymphocytic leukaemia	4 (28.6)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203m
Deaths post CTL019 infusion by primary system organ class, preferred term and Eligibility for SCT
Safety Set

Timing: Any time post CTL019 infusion, Eligibility for SCT: No

	All patients N=50
Primary system organ class **Preferred term**	**All grades n (%)**
Number of patients with at least one AE	26 (52.0)
Infections and infestations	
-Total	1 (2.0)
Sepsis	1 (2.0)
Injury, poisoning and procedural complications	
-Total	1 (2.0)
Complications of transplant surgery	1 (2.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	22 (44.0)

Timing: Any time post CTL019 infusion, Eligibility for SCT: No

Primary system organ class Preferred term	All patients N=50 All grades n (%)
Acute lymphocytic leukaemia	21 (42.0)
Glioblastoma multiforme	1 (2.0)
Nervous system disorders	
-Total	2 (4.0)
Embolic stroke	1 (2.0)
Seizure	1 (2.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203n
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

Timing: Death within 30 days of CTL019 infusion, Baseline bone marrow tumor burden: High

	All patients N=44
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	2 (4.5)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (2.3)
Acute lymphocytic leukaemia	1 (2.3)
Nervous system disorders	
-Total	1 (2.3)
Embolic stroke	1 (2.3)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203n
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

Timing: Death >30 days after CTL019 infusion, Baseline bone marrow tumor burden: Low

	All patients N=20
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	6 (30.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	6 (30.0)
Acute lymphocytic leukaemia	5 (25.0)
Glioblastoma multiforme	1 (5.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203n
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

Timing: Death >30 days after CTL019 infusion, Baseline bone marrow tumor burden: High

	All patients N=44
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	22 (50.0)
Infections and infestations	
-Total	1 (2.3)
Sepsis	1 (2.3)
Injury, poisoning and procedural complications	
-Total	1 (2.3)
Complications of transplant surgery	1 (2.3)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	19 (43.2)

Timing: Death >30 days after CTL019 infusion, Baseline bone marrow tumor burden: High

Primary system organ class Preferred term	All patients N=44 All grades n (%)
Acute lymphocytic leukaemia	19 (43.2)
Nervous system disorders	
-Total	1 (2.3)
Seizure	1 (2.3)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203n
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

Timing: Any time post CTL019 infusion, Baseline bone marrow tumor burden: Low

	All patients N=20
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	6 (30.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	6 (30.0)
Acute lymphocytic leukaemia	5 (25.0)
Glioblastoma multiforme	1 (5.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203n
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline bone marrow tumor burden
Safety Set

Timing: Any time post CTL019 infusion, Baseline bone marrow tumor burden: High

	All patients N=44
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	24 (54.5)
Infections and infestations	
-Total	1 (2.3)
Sepsis	1 (2.3)
Injury, poisoning and procedural complications	
-Total	1 (2.3)
Complications of transplant surgery	1 (2.3)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	20 (45.5)

Timing: Any time post CTL019 infusion, Baseline bone marrow tumor burden: High

Primary system organ class Preferred term	All patients N=44 All grades n (%)
Acute lymphocytic leukaemia	20 (45.5)
Nervous system disorders	
-Total	2 (4.5)
Embolic stroke	1 (2.3)
Seizure	1 (2.3)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203o
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline extramedullary disease presence
Safety Set

Timing: Death within 30 days of CTL019 infusion, Baseline extramedullary disease presence: No

	All patients N=59
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	2 (3.4)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (1.7)
Acute lymphocytic leukaemia	1 (1.7)
Nervous system disorders	
-Total	1 (1.7)
Embolic stroke	1 (1.7)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203o
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline extramedullary disease presence
Safety Set

Timing: Death >30 days after CTL019 infusion, Baseline extramedullary disease presence: Yes

	All patients N=5
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	2 (40.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	2 (40.0)
Acute lymphocytic leukaemia	1 (20.0)
Glioblastoma multiforme	1 (20.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203o
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline extramedullary disease presence
Safety Set

Timing: Death >30 days after CTL019 infusion, Baseline extramedullary disease presence: No

	All patients N=59
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	26 (44.1)
Infections and infestations	
-Total	1 (1.7)
Sepsis	1 (1.7)
Injury, poisoning and procedural complications	
-Total	1 (1.7)
Complications of transplant surgery	1 (1.7)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	23 (39.0)

Timing: Death >30 days after CTL019 infusion, Baseline extramedullary disease presence: No

Primary system organ class Preferred term	All patients N=59 All grades n (%)
Acute lymphocytic leukaemia	23 (39.0)
Nervous system disorders	
-Total	1 (1.7)
Seizure	1 (1.7)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203o
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline extramedullary disease presence
Safety Set

Timing: Any time post CTL019 infusion, Baseline extramedullary disease presence: Yes

	All patients N=5
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	2 (40.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	2 (40.0)
Acute lymphocytic leukaemia	1 (20.0)
Glioblastoma multiforme	1 (20.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203o
Deaths post CTL019 infusion by primary system organ class, preferred term and Baseline extramedullary disease presence
Safety Set

Timing: Any time post CTL019 infusion, Baseline extramedullary disease presence: No

	All patients N=59
Primary system organ class **Preferred term**	**All grades** **n (%)**
Number of patients with at least one AE	28 (47.5)
Infections and infestations	
-Total	1 (1.7)
Sepsis	1 (1.7)
Injury, poisoning and procedural complications	
-Total	1 (1.7)
Complications of transplant surgery	1 (1.7)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	24 (40.7)

Timing: Any time post CTL019 infusion, Baseline extramedullary disease presence: No

Primary system organ class Preferred term	All patients N=59 All grades n (%)
Acute lymphocytic leukaemia	24 (40.7)
Nervous system disorders	
-Total	2 (3.4)
Embolic stroke	1 (1.7)
Seizure	1 (1.7)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203p
Deaths post CTL019 infusion by primary system organ class, preferred term and Down syndrome
Safety Set

Timing: Death within 30 days of CTL019 infusion, Down syndrome: No

	All patients N=60
Primary system organ class Preferred term	**All grades n (%)**
Number of patients with at least one AE	2 (3.3)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (1.7)
Acute lymphocytic leukaemia	1 (1.7)
Nervous system disorders	
-Total	1 (1.7)
Embolic stroke	1 (1.7)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

Table 203p
Deaths post CTL019 infusion by primary system organ class, preferred term and Down syndrome
Safety Set

Timing: Death >30 days after CTL019 infusion, Down syndrome: Yes

Primary system organ class Preferred term	All patients N=4 All grades n (%)
Number of patients with at least one AE	1 (25.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (25.0)
Acute lymphocytic leukaemia	1 (25.0)

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
- MedDRA version 22.0 has been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 215i
Serious adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and BCR-ABL1-like
Safety Set

Timing: >1 year post CTL019 infusion, BCR-ABL1-like: Yes

	All patients N=4				
Group term Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one event	0	0	0	0	0
Infections					
-Total	0	0	0	0	0
Campylobacter infection	0	0	0	0	0
Cellulitis of male external genital organ	0	0	0	0	0
Clostridium difficile infection	0	0	0	0	0
Pneumonia	0	0	0	0	0
Respiratory tract infection	0	0	0	0	0
Respiratory tract infection viral	0	0	0	0	0
Urinary tract infection	0	0	0	0	0

Timing: >1 year post CTL019 infusion, BCR-ABL1-like: Yes

Group term Preferred term	All patients N=4 All grades n (%)	Grade 1 n (%)	Grade 2 n (%)	Grade 3 n (%)	Grade 4 n (%)
Vulvovaginal candidiasis	0	0	0	0	0
Serious neurological adverse reactions					
-Total	0	0	0	0	0
Seizure	0	0	0	0	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Total	1 (2.3)	0	0	1 (2.3)	0
Tumour lysis syndrome	1 (2.3)	0	0	1 (2.3)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 215n
Serious adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
